

Osama Anshasi

Amman, Jordan | osamaanshase321@gmail.com | github.com/anshase2

Professional Summary

Motivated Computer Science student at Hashemite University with hands-on experience in Backend Web Development. Proficient in building scalable REST APIs and robust database integrations using ASP.NET Core Web API, C# and Entity Framework Core. Adept at applying architectural patterns such as Clean Architecture and Repository Pattern to produce maintainable, production-ready code. Seeking a Backend Internship to apply practical software engineering skills and further develop backend systems.

Education

Hashemite University

Jordan

Bachelor of Science in Computer Science

- Cumulative GPA: 3.22 / 4.0
- Relevant Coursework: Data Structures & Algorithms, SQL Server & Database Design, C# Advanced & OOP, Software Engineering Principles, Database Management Systems

Key Projects

HR Management System (In Progress)

github.com/anshase2/HR-System

- Architecting a backend system with Clean Architecture and Repository Pattern for scalable data access using Entity Framework Core and SQL Server.
- Implementing secure JWT Authentication for role-based access control across multiple user roles.
- Integrating AI-powered CV analysis to automate candidate screening and evaluation workflows.
- Managing version control and collaboration through Git and GitHub.

Clinic Management System

github.com/anshase2/MyClinicalAPP

- Developed a medical appointment management system using ASP.NET Core MVC, Entity Framework Core, and SQL Server.
- Implemented Authentication and Authorization via ASP.NET Identity with role-based access control (Admin, Doctor, Patient).
- Built core features including appointment booking, patient feedback/rating system, Admin Dashboard, and email notifications.
- Utilized Git and GitHub for version control and project collaboration.

Weather Intelligence Application

- Built a weather data presentation application using ASP.NET Core MVC, applying clean code principles and responsive design.

Technical Skills

- **Backend:** ASP.NET Core Web API, ASP.NET Core MVC, C#, LINQ, REST APIs
- **Database & ORM:** Entity Framework Core, SQL Server, Relational Database Design
- **Architecture:** Clean Architecture, Repository Pattern, MVC Architecture
- **Authentication:** ASP.NET Identity, JWT Authentication
- **Tools:** Git, GitHub, Postman, Visual Studio
- **Web Technologies:** HTML5, CSS3, Bootstrap, JavaScript
